- ✓ *Helps improve glucose levels*
- ✓ *Helps regulate blood triglyceride and cholesterol levels*
- ✓ *Helps reduce the risk of heart disease*
- ✓ *Assists in cellular function*
- ✓ *Antioxidant function*

ADVANTAGES

This product is elaborated with ingredients that have been recognized for their performance in blood sugar regulation. It is a booster on top of a booster, seeking a safe support element in the treatment of medical conditions.

WHY SS+?

SS+ is carefully formulated to ensure the highest amount of natural elements, taking care not only to help regulate blood pressure but also not to harm any other aspect of the body.

INGREDIENTS:

Chromium: an essential element known for its ability to improve glucose levels, the effect it has had on patients with type II diabetes and to reduce the risk of heart disease. Chromium is also recognized for its ability to stimulate weight loss.

Cinnamon bark: resource extracted from the bark of a tree. Several clinical studies have shown that cinnamon helps reduce glucose, triglycerides and cholesterol levels in people with type 2 diabetes. In addition to its extracts having antibacterial and antifungal action, it is also used as an antioxidant and anti-inflammatory.

L-aspartic acid: non-essential amino acid, it can also be obtained from vegetable sources such as asparagus, avocado or molasses. Its function in the body is part of the release of hormones and regulate the nervous system.

Ginseng root: recognized as a medicinal plant. It is composed of ginsenosides, stimulants that make this plant used as an adjuvant to counteract stress, respiratory tract infections, diabetes and in the care of the immune system.

Gymnema leaf extract: known for its properties, which help reduce the amount of sugar absorbed by the body, increase the growth of cells in the pancreas, which helps regulate the insulin produced by the body. It is used in collaboration to treat conditions such as diabetes and obesity.

Bitter melon fruit extract: high in protein, calcium, iron, folic acid and dietary fiber. Among its uses is to reduce the level of sugar in the blood, this due to its natural elements such as momordica. It can also inhibit the growth of cancer cells and protect the body's cells.
